ATLANTIC GOLD FILES NI 43-101 TECHNICAL REPORT

March 15, 2018

Vancouver, British Columbia – Atlantic Gold Corporation (TSX-V:AGB) ("Atlantic" or the "Company") is pleased to announce that it has filed a National Instrument 43-101 ("**NI 43-101**") Technical Report on the Phase 2 Life of Mine Expansion Pre-Feasibility Study in respect of the Company's Moose River Consolidated Gold Mine (the "**Study**"). The technical report is available for review on SEDAR (www.sedar.com) and on the Company's website (www.atlanticgoldcorporation.com).

The results of the Study were originally presented in a news release dated January 29, 2018, which is also available for review on SEDAR and the Company's website. There are no material differences between the results announced in the news release and the results in this Technical Report.
